**From:** Tanya Matson

**Reference:**

**Subject:** CALFED Water Quality Targets for  
Parameters of Concern

**No. of Pages:** 15  
**(including cover)**

Pursuant to your request of February 24, 1998, the human health criteria contained in the California Toxics Rule was incorporated into the CALFED Water Quality Targets for Parameters of Concern table and forwarded to Phil Woods, USEPA, for his review. A copy of the table, with the added human health criteria, is following.

Phil Woods provided his comments regarding the table via voice mail message on February 25, 1998. He indicated his approval of the human health criteria, as added; however, Mr. Woods had additional comments regarding the table regarding selenium, PCBs, nutrients, pathogens and toxicity of unknown origin. In order to ensure Mr. Woods comments are clearly interpreted, it was requested that he provide those comments in written form. A copy of the February 25, 1998, fax request to Mr. Woods is following for your reference.

As of 11:30 am, February 26, 1998, no response has been received from Mr. Woods. I will forward a copy of his written comments to your attention as soon as I am in receipt of them.

*If you do not receive all pages, or if there are any problems with this transmission, please call 916 924 8844.*
